July 07, 2008

To Our Valued Customer,

The demand for propylene monomer remained strong and their continued price increase since the beginning of the year had driven up PP resin price again. Polypropylene resin now accounts for over 80% of the cost of manufacturing OPP.

Coupled with the escalating utility and transportation costs, to continue staying on as a viable manufacturer of OPP, we regrettably must increase the prices of our OPP to keep pace with these increases.

Effective with shipments on or after **August 4, 2008**, prices for all AmTopp BOPP films will be increased by **US\$ 0.30 per kilo**. For **new custom-made** orders, placed on and after **July 11, 2008**, will apply **US\$ 0.30 per kilo** increase. For **orders with OD less than 22.5"**, there will be **additional 5 cent per kilo surcharge**.

This price increase is in additional to the previous price increase announcement.

This price increase announcement letter will override any previous price agreement. All future AmTopp price quotations will automatically expire in **14** days unless otherwise specified.

Our current lead-time for regular clear coex and tape film is about 2-3 weeks. For metalize film is about 4-5 weeks, and 4-5 weeks for color film. If you have any questions on the new prices, please contact your local AmTopp sales representative or distributor.

We appreciate your understanding and thank you for your continued support.

Yours sincerely
