To Our Valued Stretch Film Customers

Our raw material producers of resin have announced a price increase scheduled for plastic resins. The increase in resin costs was reflected in the May Chem Data. The recent rise in the price of oil and strong export sales of resin products have been stated as major reasons for this price increase.

Therefore, we are announcing a stretch film price increase of \$0.04 per pound on all AmTopp stretch films. This price change will be effective on all orders received on and after June 8, 2009.

It is very important to take note that orders will be limited. We will strictly limit orders to your average monthly shipments during the last six months. We must reserve the right to limit orders during this period. Please contact your sales representative if you need any additional information.

Thank you for your continuing support of AmTopp stretch film products.

Sincerely,

Carl Grove
National Sales Manager
