FDA and Food Contact Statement

This letter is to inform you that all raw materials used in our clear stretch films comply with FDA regulation 21 CFR 177.1520 (Olefin polymers), which means our stretch films could be used for direct contact foods, and these films are considered safe for use as a secondary or tertiary packaging component.

However, CFP does not intend and no approved for directly food contact for our stretch film products so we are not able to supply following commonly requested documents

1. Bioterrorism Act of 2002 policies and procedures
2. Third party audit results
3. GMP policies and procedure
