INTEPLAST GROUP®

Multipurpose Synthetic Gloves

Synthetic gloves are made of natural polyvinylchloride (PVC) material. Compared to vinyl gloves, they have improved strength, elasticity, and durability and have benefits of latex gloves without the allergic reactions. Additionally, synthetic gloves are a little loose and allow more air to surround the fingers and palm. Synthetic gloves are produced from materials, which fully comply with FDA rule 177.1950 for food contact and FDA rule 110.10 GMP for food handling. Inteplast gloves are manufactured using DOTP (Dioctyl terephthalate phthalate). Gloves are free of DINP/ DOP/ DEHP plasticizers.
